JUAN PABLO ORTIZ MURILLO

PRODUCT DESIGNER | UX/ UI DESIGNER

13981616876 | jpssum41@msn.com | São Paulo, Brazil

Portfolio: https://cherished-operations-791449.framer.app/ | https://juanpih.github.io/JP/

SUMMARY

Product Designer and UX Designer with approximately seven years of experience across UX research, product design, and UX/UI, with front-end knowledge that strengthens collaboration with engineering teams.

I work across the end-to-end product design process, from discovery, research synthesis, flow mapping, and validation to high-fidelity design, usability testing, engineering-ready specifications, and impact measurement. My experience spans fintech, media, SaaS, iGaming, education, agribusiness, retail, and entertainment.

I specialize in complex digital products, design systems, multi-path user journeys, and authentication and account-security experiences, including SSO and MFA. I focus on clear interaction patterns, edge cases, error states, accessibility, and scalable solutions that balance user needs, business goals, and technical feasibility.

SKILLS

Product Design
UX Research & Synthesis
Authentication & Identity Flows (SSO, MFA/2FA)
Accessibility (WCAG principles)
Usability Testing
User Flows & Journey Mapping
Wireframing & Prototyping (Figma, Framer)
Design Systems
Edge Cases & Error States
Agile (Scrum, Kanban, Jira)
Engineering-ready Handoff
HTML/CSS/React knowledge
AI-assisted Design Workflows
Cross-functional Collaboration
Leadership & Adaptability

EXPERIENCE

Betano - UX/UI DESIGNER (PRODUCT DESIGN) 07/2025 - 11/2026

- Helping to product design for a next-generation iGaming platform, balancing user needs, business goals, compliance constraints, and technical feasibility across high-impact product journeys.
- Design and map end-to-end deposit, betting, withdrawal, and account-security flows, including MFA, payment-gateway integration, and success, processing, validation, and error states.
- Define multi-path user flows, edge cases, interaction logic, wireframes, prototypes, and high-fidelity designs in Figma, preparing clear specifications for engineering handoff.
- Partner with multidisciplinary teams across Brazil, the Philippines, and China to align product requirements, user experience, and implementation across different time zones and cultural contexts.
- Use AI-assisted workflows to accelerate ideation, validation, documentation, and handoff while maintaining design-system consistency and product quality.

United Parks & Resorts - UX/UI DESIGNER (PRODUCT DESIGN) 07/2024 - 06/2025

- Enhanced a B2B SaaS/CRM platform by auditing existing UI patterns, identifying usability and consistency issues, and adapting workflows to product and brand requirements.
- Created user flows, high-fidelity designs, and interactive prototypes in Figma for complex B2B scenarios and responsive interfaces.
- Expanded and maintained reusable components and design-system patterns to improve consistency, scalability, and delivery efficiency.
- Worked closely with developers to clarify states, responsive behavior, and implementation details, helping ensure designs functioned as intended in dynamic environments.

SBT TV CHANNEL - UX/UI DESIGNER (PRODUCT DESIGN) 03/2023 - 08/2024

- Directed the redesign of SBT digital products across web and apps, including its multi-platform SSO experience, while creating a scalable and cohesive design system.
- Mapped authentication and account journeys across platforms, considering sign-in states, access continuity, validation, recovery scenarios, and consistency between products.
- Designed reusable UI patterns and components aligned with Angular and React implementation models, improving collaboration between design and engineering.
- Developed interactive prototypes and multi-step user flows in Figma to communicate behavior, navigation, and product logic before implementation.
- Iterated on designs using user feedback, analytics, and cross-functional review, translating findings into product and interaction improvements.
- Maintained design-system consistency across a broad product ecosystem while adapting patterns to different screen sizes and use cases.

J.ASSY - UX/UI DESIGNER 06/2022 - 03/2023

- Led UX/UI exploration for agricultural products through low- and high-fidelity prototypes, testing concepts for usability, feasibility, and product impact.
- Created interactive prototypes in Figma and Sketch to simulate key workflows, interface states, and final-product behavior.
- Planned and conducted usability tests on prototypes, identifying friction points and translating findings into iterative design improvements.
- Maintained and evolved the company's design system to support consistent implementation and scalable product growth.

ALLOY MIT - UX/UI DESIGNER 11/2021 - 06/2022

- Designed user journeys, information architecture, and the design system for a cryptocurrency-focused fintech product, including account and authentication experiences with MFA.
- Developed a B2B investment ecosystem that enabled clients to monitor portfolio and investment progress through clear information hierarchy and product flows.
- Maintained the banking-product UI system and synthesized desk-research findings into interface and interaction decisions for a clearer, more intuitive experience.
- Structured and mapped payment journeys across Pix and credit card methods, including alternate paths, validation, and transaction states, with a focus on usability and experience optimization.

WIZARD SCHOOL - UI/UX RESEARCHER 08/2019 - 11/2021

- Researched user behavior and preferences across digital and social experiences to identify usability, content, and engagement opportunities.
- Synthesized research observations and user feedback into actionable recommendations for content presentation, interaction, and visual design.
- Managed user-generated content and refined interface elements, including information presentation, color, and imagery, to improve clarity and engagement.

EDUCATION

Bachelor's Degree: Graphic Design — University of Cundinamarca, Colombia

UX/UI Design — EBAC

Web Development — Udemy
